Солнечные часы

Equinox is a young designer label who operates in gnomonics and was born in order to offer specialized works and services for the designing and construction of sundials whatever the size or type.

SUNDIALS

OUR PASSION
OUR TALENT
OUR DESIGN

paoletti fiori design

A constant research of new technologies and selected partners as *architects, painters, sculptors and ceramists* allow us to offer a superior level product having always an original design.

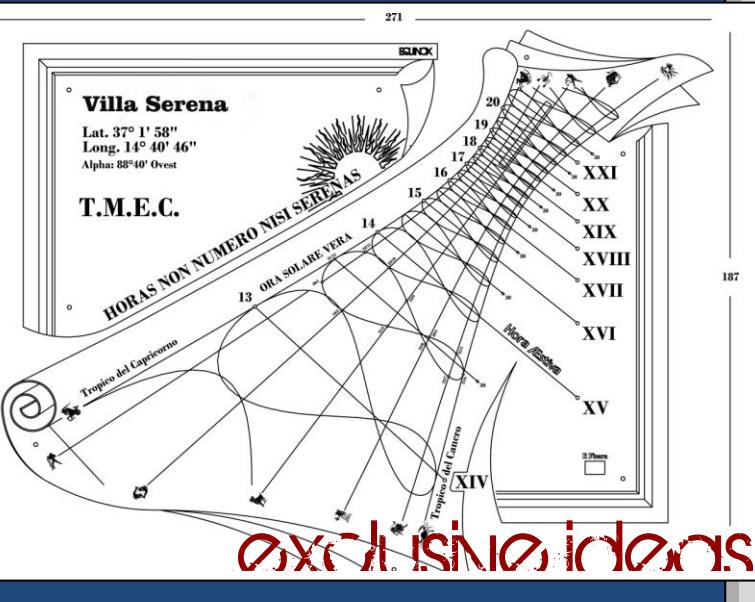

design

Whether very simple or sumptuous, either with a classic or modern design each and every work has been studied and adjusted from a stylistic point of view to the future hosting setting.

Unique pieces...

exclusive ideas

City Hall of Canicattini Bagni: the vertical Sundial

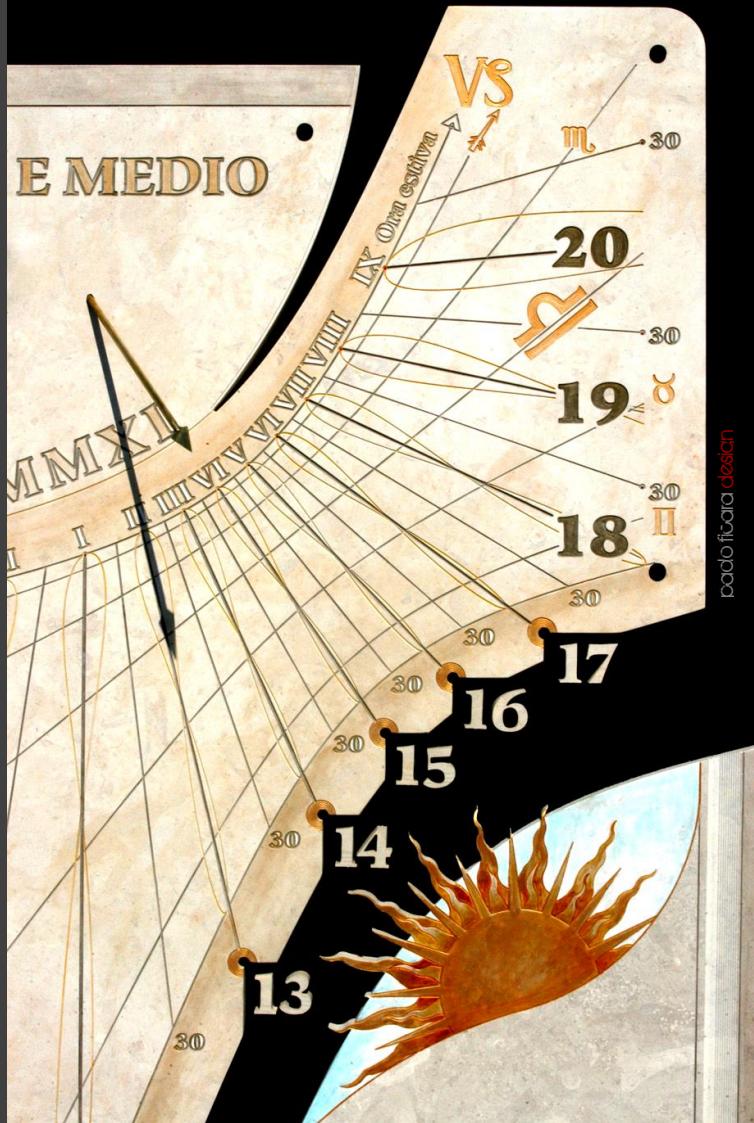

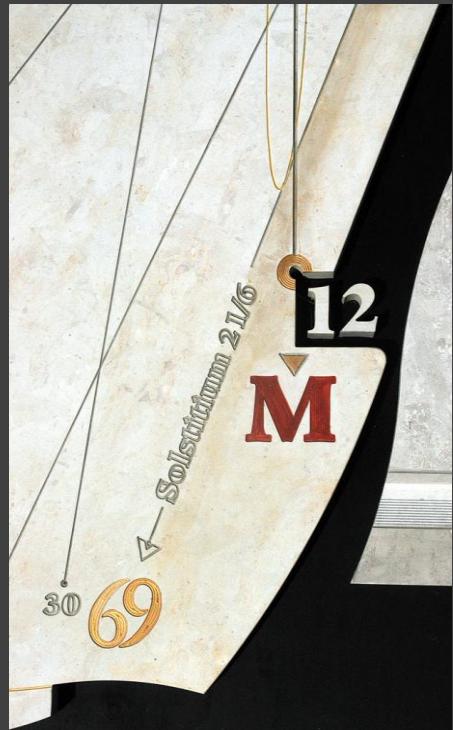

Ours is not a mass production. Our dials are designed to be "unique pieces".

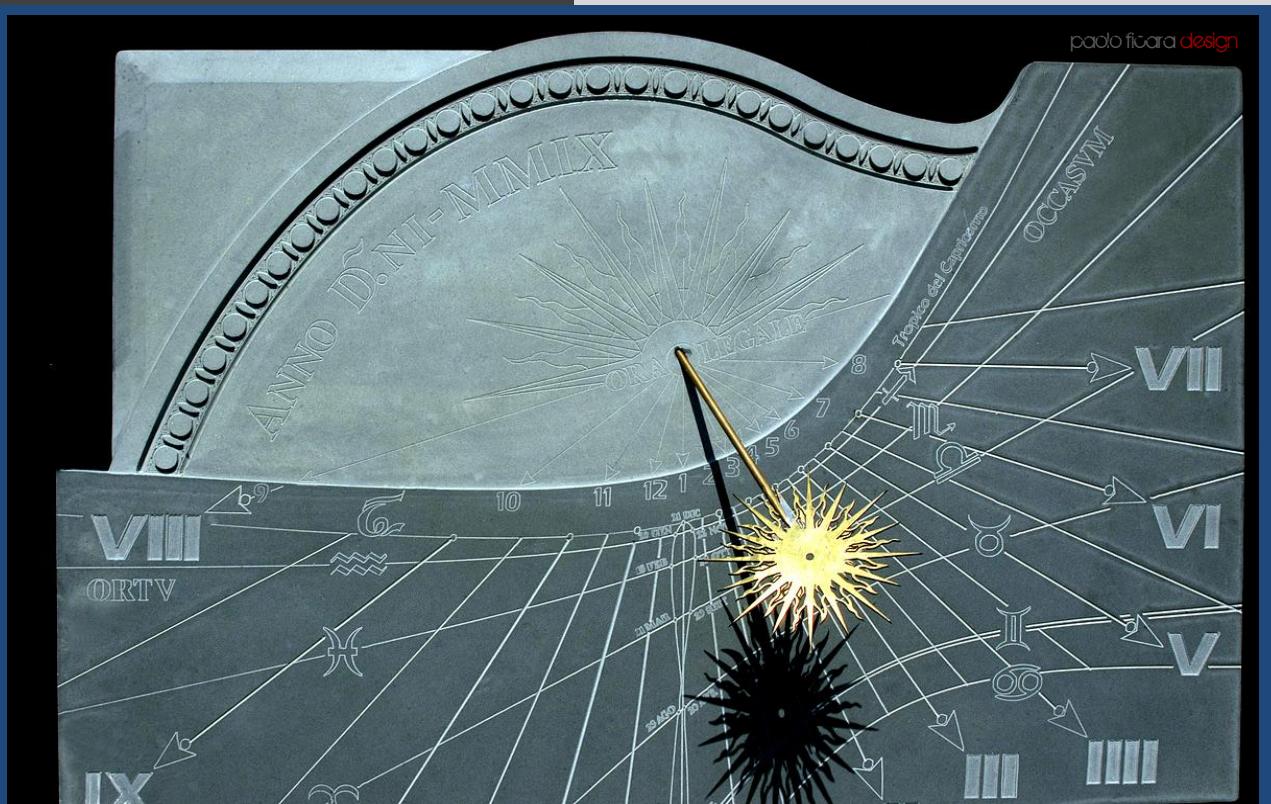

CURVA PASSIONE

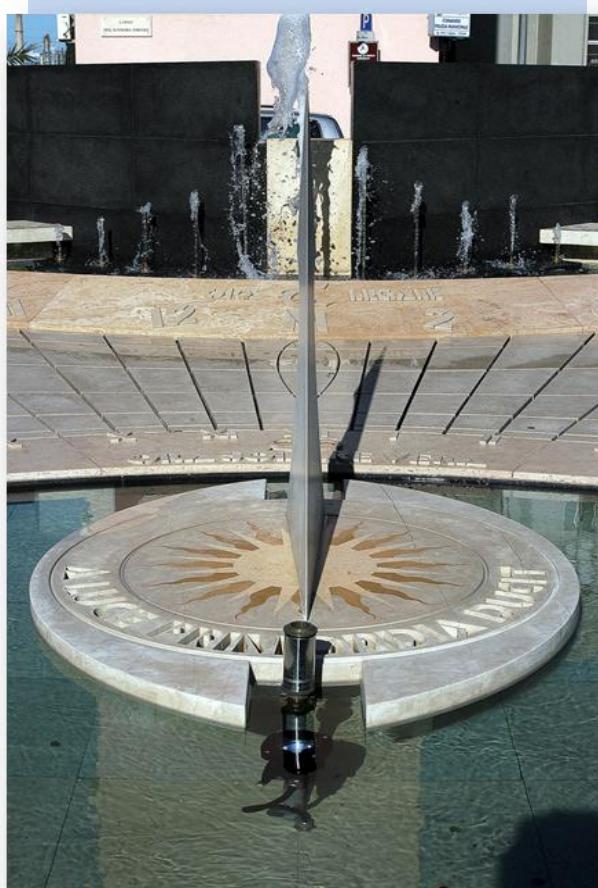

CURVA
PASSIONE

refined beauty

Urban areas, squares, parks, villas, gardens, historical and modern buildings, are embellished with our gnomonic works: a new and yet refined beauty.

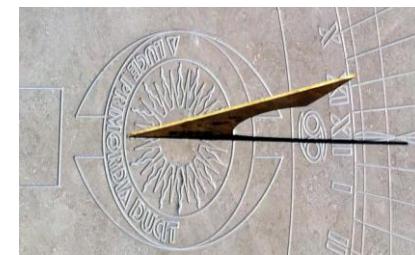

The reliability of each component of the finished sundial is a result of an accurate blueprint, scaled working model and precision workmanship.

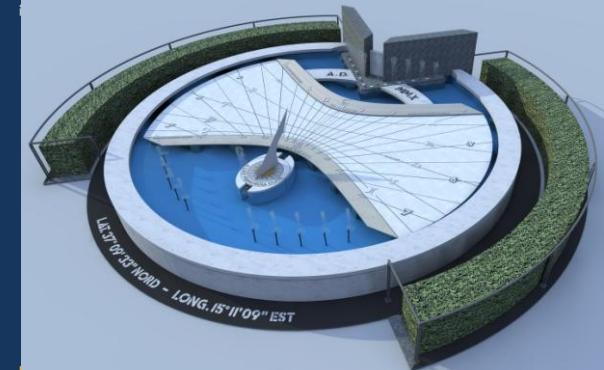

Ingenious design and uncompromising technique. Here you can see the perfect shapes of the large sundial in Prido Gargallo near Syracuse.

12 meters of absolute precision with water feature - the first to be built worldwide.

Innovation

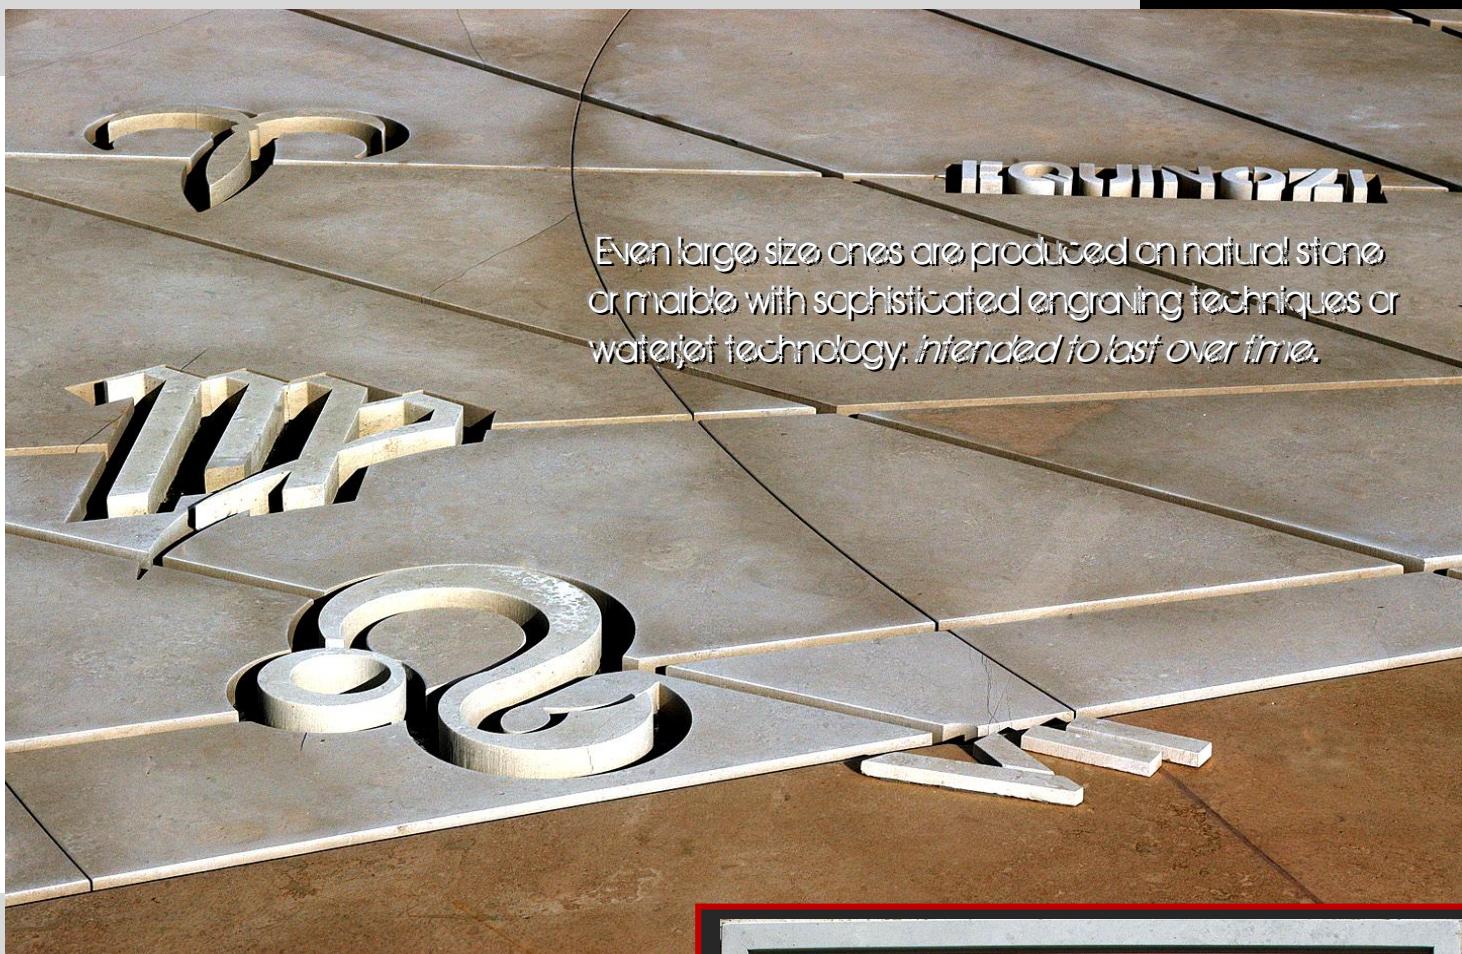

Innovation

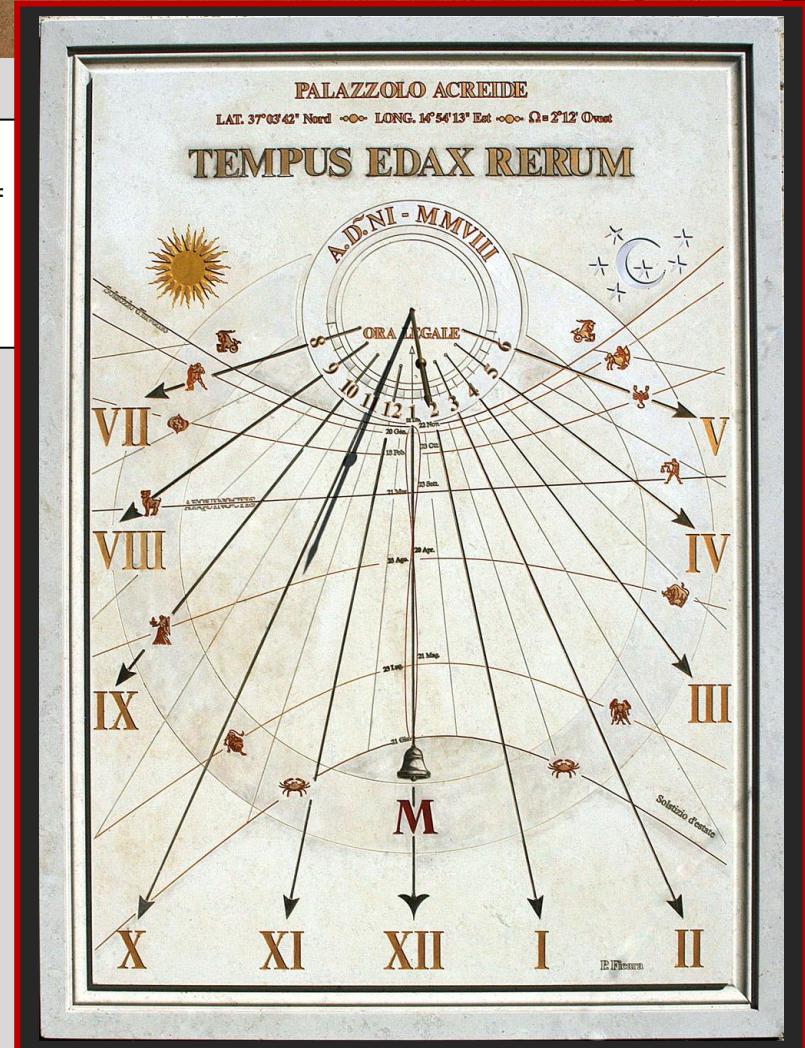

L'opera è stata eseguita dall'impresa V. Cavarra .

DESIGN

Even large size ones are produced on natural stone or marble with sophisticated engraving techniques or waterjet technology, intended to last over time.

Always hand finished, the pictorial or sculpture work embellishes the contents of every sundial as according to the best traditions.

YOUR TIME OUR PASSION

The Church of S. Paolo in Palazzolo Acreide

Our flexibility allows our works to be optimally placed everywhere both on contemporary as well as on historical architectures.

flexibility

Wherever there's sun there might be EQUINOX

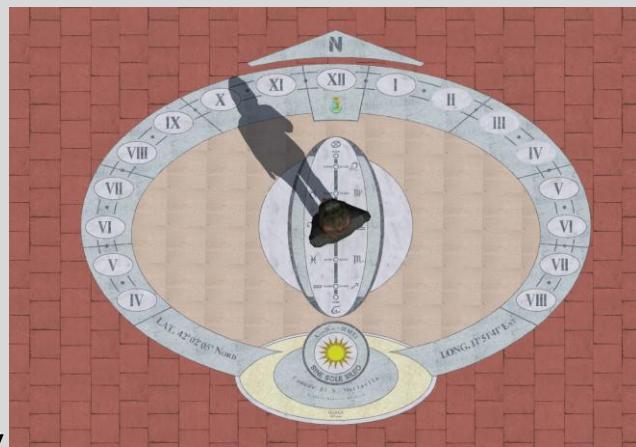

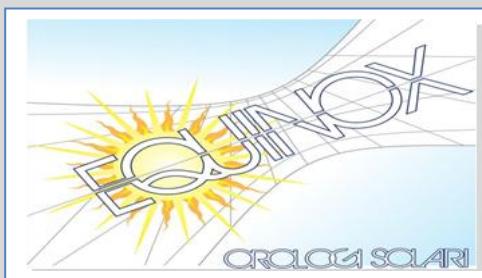

Creativity

Carlo Tigrà design

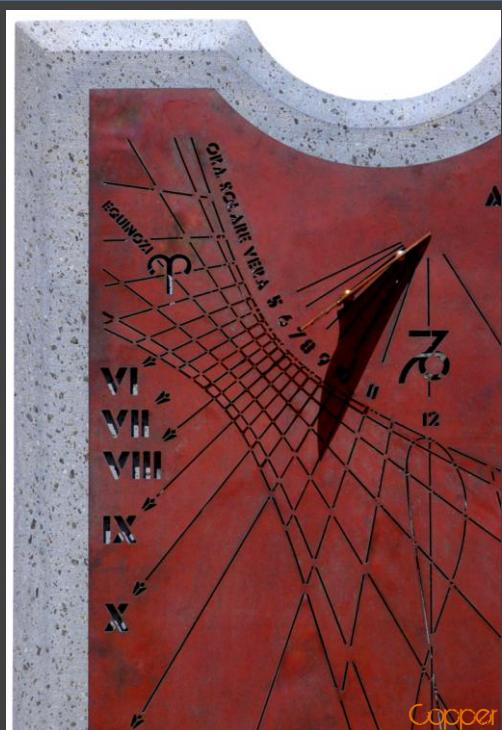

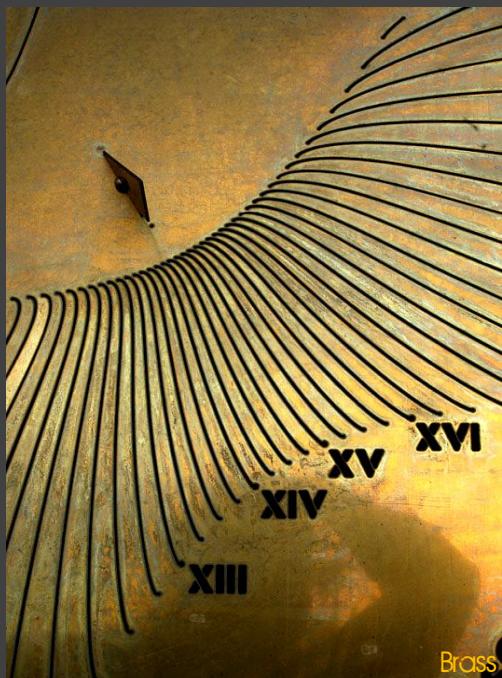

Andromachic Sunsets

This is briefly our philosophy and the light of our creativity which our clients - whether they are public or private corporations, professionals, enterprisers or private individuals - along with our professionalism do value.

professionality

paulo fiúra **design**

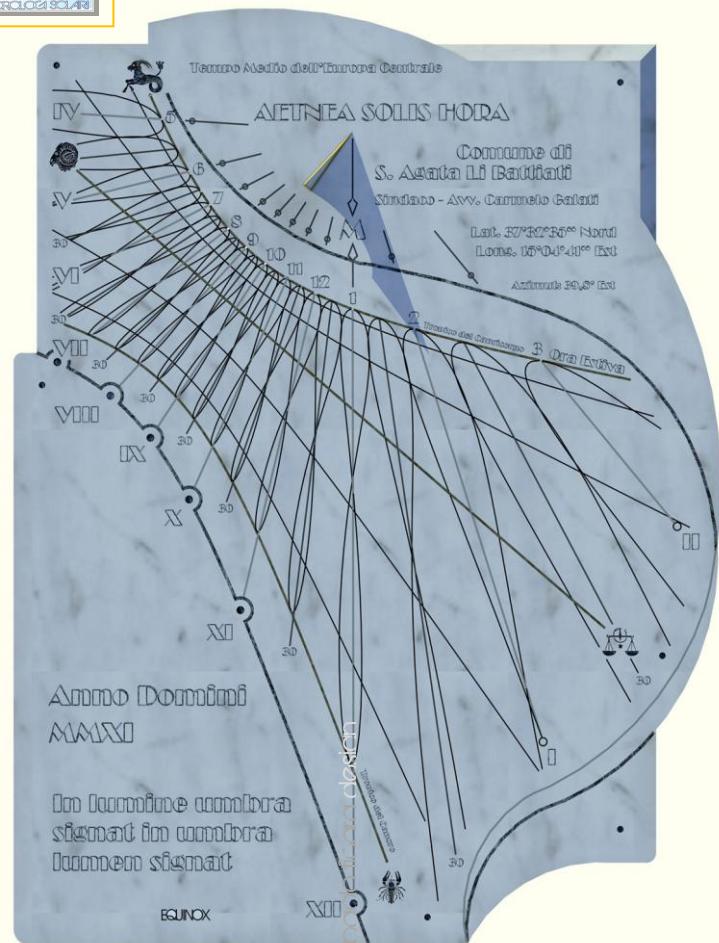

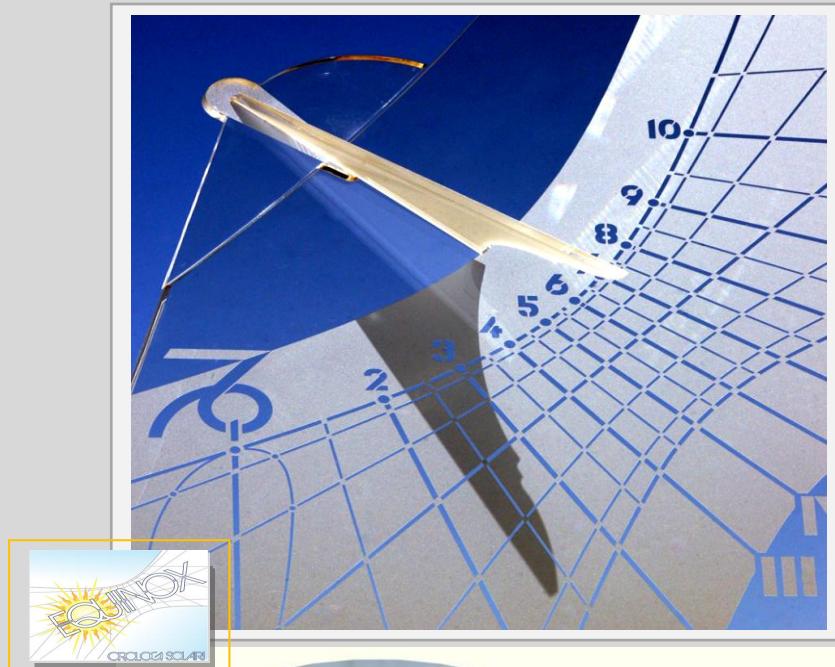

Interior Sundial: technology and design.

We also use synthetic material: ceramic, stainless steel, copper, aluminum, brass, reconstructed stone, glass... or those chosen by the customer.
